

Engineering Internship at Eltronic A/S Ballerup - Autumn 2025

Do you want to be part of developing innovative and technical engineering solutions while further developing your professional skills? Then join us and become an intern at Eltronic A/S.

Eltronic A/S is one of Denmark's leading engineering companies within development, delivery, and servicing of automation- and production solutions for the manufacturing-, life science-, and food industries.

In our Ballerup division we primarily focus on automation projects within the life science- and F&B industries. Our projects are characterized by the development of innovative customer-specific solutions to meet our clients' individual desires and needs.

As an intern at Eltronic, you will have the opportunity to apply the knowledge you have gained during your studies to practical and relevant professional experience through our projects.

Your tasks and everyday work will be diverse, and you will contribute to both larger and/or smaller projects, where you will have the opportunity to make your mark on your tasks.

We will match your interests and competencies with real challenges and tasks. During your internship, you will be assigned a mentor, and we will ensure that you always have a skilled colleague available for sparring.

Eltronic A/S is growing, and for the right candidate, there may be good opportunities for future employment. We aim to employ our interns in a permanent position or as student assistants as much as possible after the completion of the internship.

We are looking for interns in the following areas:

- Process Automation within Life Science and F&B industries (PLC-programming)
- Manufacturing Software Solutions (SCADA/MES/MIT)

We imagine that you are studying:

- Technology Management and Marine Engineering (Maskinmester)
- Automation Engineering (Automationsteknolog)
- Engineering, Innovation, and Business
- Electrical Energy Technology
- Other relevant education

You may have a different relevant educational background, but what is most important to us, is that you have a natural interest and flair for advanced technical solutions while also having the desire to learn much more.

Depending on the area you wish to intern in, experience with PLC-software and AVEVA-Software, or equivalent may be an advantage, although not required.

As a person, you are responsible, quality-conscious, thorough, punctual, and thrive in an informal organization.

We offer

An exciting internship and learning opportunity in one of our departments, where your everyday life will be characterized by challenging and exciting tasks that you solve in collaboration with skilled and helpful colleagues.

As an intern, you will be assigned your own desk, and you will become part of our strong community, which also includes other interns and student assistants. You will also be a part of the social events that take place during your internship.

Eltronic A/S

Eltronic A/S is an engineering company with more than 24 years of experience in production systems, automation, and digitalization. We employ more than 300 engineers and technicians within a wide range of disciplines and with many different competencies.

Eltronic A/S is part of Eltronic Group - an engineering group that delivers intelligent special solutions in close contact with our customers, helping to increase their competitiveness and create a sustainable business.

Questions & Application

If you are one of our future interns, please apply as soon as possible.

Employment from August/September 2025, or by agreement.

If you have any questions, feel free to reach out to:

HR Partner Rebecca Andersen, via email: HR@eltronic.dk / phone: +45 41 77 08 30.

We look forward to receiving your application and welcoming you as part of our amazing team!
