

Automation and Manufacturing IT Engineer Internships, Spring 2027

Do you want to be part of developing innovative and technical engineering solutions while further developing your professional skills? Then join us and become an intern at Eltronic A/S.

Eltronic A/S is one of Denmark's leading engineering companies within development, delivery, and servicing of automation- and production solutions for the manufacturing-, life science-, and food industries.

In our Ballerup division we primarily focus on automation projects within the Life Science industry. Our projects are characterized by the development of innovative customer-specific automation software solutions to meet our clients' individual desires and needs.

Part of the team

As an intern at Eltronic, you will have the opportunity to apply the knowledge you have gained during your studies to practical and relevant professional experience through our projects.

Your tasks and everyday work will be diverse, and you will contribute to our projects, where you will have the opportunity to make your mark on your tasks.

We will do our best to match your interests and competencies with real challenges and tasks. During your internship, you will be assigned a mentor, and we will ensure that you always have a skilled colleague available for sparing.

We imagine that you

- For our Automation team are studying Engineering, Technology Management and Marine Engineering (Maskinmester), Automation Engineering (Automationsteknolog), or other relevant education
- For our Manufacturing IT(MIT) team are studying software technology, software engineering, ICT engineering, electro engineer or other relevant education.
- Have a natural interest and flair for technical solutions while also having the desire to learn much more
- Are responsible, quality-conscious, thorough, and enjoy collaborating with others
- Might have a background as an electrician, prior experience with PLC-software and/or AVEVA-Software and/or SQL-databaser, or equivalent may be an advantage, although it is not required

We offer

An exciting internship and learning opportunity in one of our Automation or MIT departments, where your everyday life will be characterized by challenging and exciting tasks that you solve in collaboration with skilled and helpful colleagues.

As an intern, you will get your own desk, and you will become part of our strong community, which also includes other interns. You will also be a part of the social events that take place during your internship.

Eltronic A/S

Eltronic A/S is an engineering company with more than 25 years of experience in production systems, automation, and digitalization. We employ more than 250 engineers and technicians within a wide range of disciplines and with many different competencies.

Eltronic A/S is part of Eltronic Group - an engineering group that delivers intelligent special solutions in close contact with our customers, helping to increase their competitiveness and create a sustainable business.

Questions & Application

If you are one of our future interns, please apply as soon as possible.

Employment from January/February 2027, or by agreement.

If you have any questions, feel free to reach out to Automation Manager CPG, Stephan Nielsen at snin@eltronic.dk, Automation Manager Life Science, Sune Knutzen at sdkn@eltronic.dk, or MIT Manager, Naveed Yousaf at nayo@eltronic.dk.

We look forward to receiving your application and welcoming you as part of our amazing team!
