

Automation Software Specialist

Are you an out-of-the-box thinker with a knack for pushing the boundaries of technological innovation?

At Eltronic A/S, we are continuously embarking on new adventures, and this means new projects, new challenges and more innovation.

Job description

For Eltronic we are looking for a creative standout automation software engineer with a deep understanding of industrial automation, and proficiency in C# software development. Join us in revolutionizing the way automation solutions are developed and implemented.

You will be part of our small, dedicated team that focuses on developing ambitious solutions and high-quality tools that supports Eltronics continuous innovation of industrial automation solutions.

Key Responsibilities:

- Spearhead the development of cutting-edge software applications using C# to accelerate project execution of automation projects
- Conceptualize and execute automation solutions that set new industry standards
- Pioneer new approaches and methodologies in industrial automation software development
- Participating in automation related development activities

Your profile

To succeed in this position, we expect that you can recognize several of the bullets below:

- An ability to invent new concepts that tackle the challenges of automation project execution
- Proven experience in implementing high quality automation solutions within industrial automation
- A visionary and quality minded automation software engineer with good C# skills
- A pioneer in problem-solving, also equipped with an eye for detail
- Strong communication skills
- You value a collaborative environment and have remarkable collaboration skills to drive innovation within a dynamic team-based organization.

If you are driven by a passion for innovation, fueled by a desire to challenge the status quo, and ready to leave your mark on the world of industrial automation, we invite you to bring your unique perspective to our team. Embrace the opportunity to redefine what's possible in automation technology.

We offer

At Eltronic A/S, we devote a lot of focus to our employees. Therefore we are proud of our work environment where we balance high professionalism with flexibility, and you can be a part of it too. Some of the employee benefits you will get at Eltronic A/S are:

- Competitive salary
- Pension and health insurance agreements
- Staff association and social gatherings
- Work from home opportunities
- Continuous professional- and personal development
- An innovative-, inspiring-, and motivating work environment

Who is Eltronic A/S?

Eltronic A/S is one of the leading suppliers for some of the largest industrial companies in Denmark. We have more than 24 years of experience with developing innovative customized solutions within automation, digitalization and production systems. At Eltronic A/S we take great pride in being a contributory force to improve our customers' global competitiveness.
